

2-day In-person Seminar:

# How to build a complete Safety, Health & Environment Management System through Standards & Practices

-  Baltimore, MD
-  April 6th & 7th, 2017
-  9:00 AM to 6:00 PM

## James Thatcher

President, Global Safety Solutions, LLC

James Thatcher the owner and President of Global Safety Solutions, LLC, headquartered in Divide, Colorado. Dr. Thatcher has 35 years of experience in the Oil and Gas, Metals/Minerals and Chemical industry, with management positions in engineering, operations, human resources, safety, health and environment, as well as training and security.

He has a MS in mechanical engineering, and a Ph.D. in psychology/organizational development. He has had many articles published in the Occupational Hazards Magazine, the VPP Leadership Magazine, IADC driller magazine, and through several organizations such as the National Safety Management Society and the World Safety Organization. He has presented at many seminars, summits, conferences, and association meetings for many years.

### Overview :

A management system, by definition, is a process by which a function or functions are carried out in an organization by a series of hierarchal documents that are prescriptive, and set a particular path on which the organization manages its day-to-day operations.

A management system can be for one function, but more often than not, it incorporates many functions. Functions like accounting, engineering, banking, etc.
